RS600

The RS600 double output relay is part of the SALUS Smart Home System. This product was originally designed to be used for Rollershutters only, but this device can do so much more, giving the homeowner various options. It gives the homeowner the possibility to control any devices that require two outputs, for example Window Shutters, Garage Doors, Gates, Motorised Curtains or Lights. All this from anywhere via the Smart Home App and making use of the OneTouch rules.
