Make your home a **Smart Home** with

SALUS
Smart Home Kits

We have a range of SALUS Smart Home Kits available. All come pre-paired to make set up quick and simple. The system can then be expanded, with any of the products in the SALUS Smart Home range, at any time to suit your needs. So you can control your home from anywhere via Smartphone, Tablet or PC.

SH-BAS - Starter package basic

Contents: 1 piece. UGE600, 1 pc. VS20WRF, 1 pc. TRV10RFM.
Use this package if you want a simple radiator
controlled via the SALUS smart home app.
The heating system can be expanded at any time by adding additional thermostats, TRVs, sensors or smart connectors upgrade.

SH-ADV - Starter package advanced

Contents: 1 piece. UGE600, 1 pc. VS20WRF, 1 pc. TRV10RFM, 1 pcs. OS600 and 1 pc. SPE600.
Use this package if you want a simple radiator controlled via the SALUS smart home app. At the same time, you can try the many options available in the system when you have a wireless door / window sensor and a Smart Plug. You can include:
Turn off the heat when the window opens
Turn on the light as you enter the door
Get a message by SMS or mail when door / window opens
Turn up the heat when the door is closed
Light on for 10 minutes after returning home
Make time management on your lamps,
... and much, much more. All devices in the smart home system can be combined with each other via SALUS smart home OneTouch rules, which you can create in-app yourself.
The heating system can be expanded at any time by adding additional thermostats, TRVs, sensors or Smart plugs or buttons for upgrading.
